

Michael Beach received his Ph.D in Biochemistry from Purdue University and joined the Centers for Disease Control and Prevention (CDC) in 1989. Dr. Beach is currently Associate Director for Healthy Water in CDC's National Center for Emerging and Zoonotic Infectious Diseases where he serves as a strong advocate for reducing the global burden of water, sanitation, and hygiene-related disease. He is also Chief of the Waterborne Disease Prevention Branch (WDPB). The WDPB oversees the Center's waterborne disease activities including domestic and international waterborne disease outbreak investigations, the Healthy Swimming Program, national surveillance for cryptosporidiosis, giardiasis, and the free-living amebae, and the national Waterborne Disease and Outbreak Surveillance System. He founded CDC's Healthy Swimming program, led the development of CDC's Healthy Swimming ([www.cdc.gov/healthyswimming](http://www.cdc.gov/healthyswimming)) and Healthy Water ([www.cdc.gov/healthywater](http://www.cdc.gov/healthywater)) websites, is the CDC collaborator on the U.S. Environmental Protection Agency's beach water quality epidemiology studies, and is a Steering Committee member for CDC's national Model Aquatic Health Code ([www.cdc.gov/MAHC](http://www.cdc.gov/MAHC)) effort to improve health and safety at US aquatic venues.
